Communication strategy

The objective of the project, as well as of the Climate Change Roadmap for Navarre (HCCN-KLINA) of which it is a part, is **to prepare citizens to tackle the effects of climate change**. To carry out the purpose of a good project communication, it has been using different formulas:

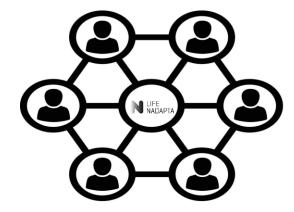

Official and partners websites and social networks

Conclusions

- o The results obtained so far are diverse after six of the eight years that the project has lasted.
- Nevertheless, it has been detected that depending on the type of approach, the response of the public or the direct agents involved may be higher if the subject <u>directly affects</u> them.
- Furthermore, it has also been perceived that giving close examples sharpen attendees' interest and allows them a <u>better understanding</u> of the issue and the possible measures to be implemented.

There is no magic recipe or formula!

Thank you!
